

## **Corn Weed Management at Lamberton, MN in 2015.**

Vollmer, Travis D., Jeffrey L. Gunsolus and Bruce D. Potter

The objective of this study was to evaluate corn herbicide combinations for annual grass and annual broadleaf weed control in corn. This study was conducted on a Ves Loam soil containing 4.1% organic matter, pH 5.9 and soil test P and K levels of 15 and 150 lb/A, respectively. A randomized complete block design with four replications and a plot size of 10 by 30 ft was used. The site was planted to soybeans in 2014 and fall tillage was done using a mulch ripper. The area was fertilized with 150 lbs of nitrogen as anhydrous ammonia in the spring of 2015. On April 29, 2015, Pioneer 'P9834AMX' glufosinate/glyphosate resistant field corn was planted in 30-inch rows at a seeding rate of 34,000 seeds/A. Herbicide treatments were applied with a tractor-mounted compressed air sprayer delivering 15 gpa at a pressure of 35 psi. The sprayer was equipped with 8002 flat-fan nozzles spaced 15 inches apart on the boom. Application dates, environmental conditions, plant sizes and rainfall data are listed below:

Date	April 30 PRE	May 20 POST I	May 28 Post II	June 16 Post III	June 25 Post IIII

(Southwest Research and Outreach Center, University of Minnesota, Lamberton).

Yield, herbicide rates and weed control are listed in Table 1.

Yellow foxtail was the predominate weed species. Breakfree NXT lite and GF-3471 @ 3 qts provided the highest level of PRE grass control. Accuron @ 3 pt and Corvus @ 5.6 oz provide the lowest yellow foxtail control. Harness @ 1.25 & 2.25 pts and Dual II Magnum @ 2 pts provided lower lambquarters control than the best performing PRE treatments. All PRE treatments provided excellent initial waterhemp control. Obvious herbicide injury symptoms were not observed in this trial. All herbicide programs yielded better than the untreated check. Total post treatment of Realm Q + Abundit Extra yielded less than the highest yielding treatments.

**Table 1. Herbicide performance in corn at Lamberton, MN in 2015 (Vollmer, Gunsolus and Potter).**
